

Ypsilon Round Top Table

Ypsilon Round Top Table

Ypsilon 4 Base

Ypsilon 4 table base is suitable for large table tops. The base is light weight and resistant to the weather, suitable for indoor and outdoor locations (depending on the top material)

An aluminium extruded tube that extends itself towards the legs of its cast base in the same material. Ypsilon leans itself on the floor softly, with transparent plastic feet, just as if it is floating in the space that contains it.

Suitable for tables up to 1300 dia or 900x900 square
